- CSS
- JavaScript
- React.js
- Java
- Clickup
- Alpine.js
- Axure
- Bootstrap
- Tailwind CSS
- Git & GitHub
- PHP Laravel
- SQL

ABOUT ME

I am a full-stack web developer with a strong focus on user-centered design and a year of experience through Lithan Academy's EducLaas programme. I have built responsive, interactive websites using frameworks like React.js and PHP Laravel. Currently, I am pursuing a Higher Diploma in Software Engineering as part of my Bachelor's Degree path. My foundation in UI/UX is supported by practical experience using design tools such as Axure and ClickUp to prototype, plan, and enhance user flows.

EXPERIENCE

2024 December - 2025 January
Meals On Wheels - PHP Laravel

- Developed and maintained core backend functionalities for the Meals on Wheels platform using PHP and MySQL, ensuring efficient food delivery management and real-time order tracking.
- Designed secure session-based user authentication and role-based access control to streamline operations for admins, volunteers, and beneficiaries.
- Optimized database queries and data flow between front-end and server, reducing page load and response time by improving SQL efficiency.

2025 March
Used Cars Sales Portal - PHP Laravel

- Designed and built a full-stack Used Cars Sale Portal using Laravel, Breeze, and Blade templating engine, enabling users to list, browse, and inquire about vehicles with ease.
- Implemented secure user authentication, registration, and dashboard features using Laravel Breeze for streamlined onboarding and session handling.
- Developed dynamic pages, filtering, and search features with Blade and Eloquent ORM to ensure responsive and data-driven user interactions.

2025 June
Smartshop E-commerce website - (Alpine.js)

- Designed and developed SmartShop, a full-stack e-commerce platform using HTML5, Tailwind CSS, Alpine.js, and PHP, delivering a clean and responsive user interface.
- Integrated AI-powered APIs using PHP cURL to generate dynamic product descriptions and image tags, streamlining the product listing process for sellers.
- Enhanced user interaction through scroll animations, image previews, and clipboard copying using Vanilla JavaScript and AOS library.
